Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 1st session, is to be understood.

V.2 2

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{3}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

490263

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.**, by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

Notes of General Interest

The economics of the meat situation in its various phases is thoroughly covered in a series of five reports by specialists of the Department of Agriculture. Four of these reports have now appeared. Part 5, Agriculture Department Report 113, describing the methods and cost of marketing live stock and meats, is now in the hands of the printer and will be issued in the near future. The treatment of this subject is the result of a campaign of education by the States and Federal Government working in cooperation among the stockmen and farmers and should aid materially in increasing the output of meats and minimizing the cost of production.

Trust Laws and Unfair Competition covers the field which the subject embraces in an exhaustive manner. Besides a table of cases in American, English, and colonial courts, it contains an historical account of antitrust laws, dealing principally with the legislation and judicial decisions of the United States and foreign countries with respect to industrial combinations and unfair competition. Price, 40 cents.

Papers on a variety of timely agricultural topics appearing in the Yearbook of the Department of Agriculture for 1915 have been reprinted. These include all except "Osage Orange Waste as a Substitute for Fustic Dyewood," for which number 670 has been assigned.

Other contributions herein briefly reviewed are selected from publications issued by the Government Departments during the current month:

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see page 54.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis,* except as otherwise indicated. Publications should be ordered by the *publication number,* and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 1st session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{3}{10}$c. for each

additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

Notes of General Interest

The Report of the Commissioner of Education for 1915, listed on pages 262 and 337 of the December, 1915, and January, 1916, Monthly catalogues, respectively, will include only one volume. Owing to the impossibility of compiling the statistics within the time set by Congress, the material that would have appeared in Volume 2 of the 1915 report will appear in Volume 2 of the report for 1916.

The catalogue of the public documents of the Sixty-second Congress and of other departments of the Government of the United States for the period from July 1, 1911, to June 30, 1913, issued biennially and prepared under the supervision of the Superintendent of Documents, is now ready for distribution and will be forwarded to the depository libraries in the September invoice. This is volume 11 in the series of document catalogues authorized by the law of January 12, 1895, and gives a complete record of the publishing work of the United States Government for the period covered. Price, cloth, $2.50.

The State Department has issued another installment of its "Diplomatic Correspondence with Belligerent Governments Relating to Neutral Rights and Duties." This is Part 3 of the series commonly called the "White Book." It contains the text of papers which were exchanged with various Governments on subjects relating to restraints on commerce, contraband lists, interference by belligerents with mails, submarine interference with commercial vessels, the cases of the steamships Arabic, Joseph W. Fordney, Leelanaw, Sussex, William P. Frye, and Appam, and other matters in controversy arising out of the European War. Price, $1.00.

Other publications by the various Executive Departments of the Government are here briefly reviewed under subject headings, followed by a list of those which were reprinted to replenish the stock of the Superintendent of Documents:

AGRICULTURE

Corn Culture in the Southeastern States (Farmers' Bulletin 729).—Discusses the preparation of land, planting, commercial fertilizers, and machines used in the cultivation of corn in certain sections of the cotton belt of the South. Price, 5 cents.

Peanut Oil (Farmers' Bulletin 751).—A brief outline of an industry which can be made commercially profitable and at the same time provide a new outlet for the increased production of peanuts in the South. Price, 5 cents.

Fish Meal: Its Use as a Stock and Poultry Food (Agriculture Department Bulletin 378).—Sets forth the value of fish meal as a food for domestic animals for the purpose of stimulating its more general use and manufacture. Price, 5 cents.

Dust Explosions and Fires in Grain Separators in the Pacific Northwest (Agriculture Department Bulletin 379).—Illustrated summary of results of field work relative to the causes of ignition and description of various preventive devices. Price, 10 cents.

New Sorghum Varieties for the Central and Southern Great Plains (Agriculture Department Bulletin 383).—Illustrates and describes new strains of

sorghum with comparison of the field records and their value for cultivation in certain portions of Texas, Kansas, and Oklahoma. Price, 5 cents.

IRRIGATION

Colorado River and Its Utilization (Geological Survey Water-Supply Paper 395).—Discusses various problems involved in the development of this area, such as irrigation systems, storage works, and river control; with illustrations, diagrams, and maps. Price, 50 cents.

LABOR

Proceedings of Employment Managers' Conference (Labor Statistics Bureau Bulletin 196).—Contains an account of the discussions and papers read before the conference on problems that concern both employer and employee. Price, 10 cents.

MINES AND MINING

Elementary First Aid for the Miner (Miners' Circular 23).—General directions for the care and treatment of persons injured in mine accidents. Price, 5 cents.

History and Development of Gold Dredging in Montana (Mines Bureau Bulletin 121).—Papers read at the 2d Pan American Scientific Congress held at Washington, D. C., Dec. 27, 1915–Jan. 8, 1916; with illustrations and diagrams of dredges. Price, 30 cents.

The Lignite Fields of Northwestern South Dakota (Geological Survey Bulletin 627).—Detailed descriptions of townships and results of geological examinations, with geologic maps of Harding and Perkins counties, S. Dak. Price, 25 cents.

NAVIGATION

The Ohio River (Engineer Department, 1916).—Contains charts, drawings, and description of features affecting navigation, War Department rules and regulations for the river and its tributaries, navigable depths and tables of distances for tributaries. Price, 45 cents.

PATENTS

Manual of Classification of Subjects of Invention of United States Patent Office, revised to Jan. 1, 1916.—Valuable aid to the investigator in searching classified United States patents when their essential characteristics are known. Price, paper, 25 cents; cloth, 65 cents.

PETROLEUM PRODUCTS

Construction and Operation of a Single-tube Cracking Furnace for Making Gasoline (Mines Bureau Technical Paper 161).—Outlines briefly the principles involved in the cracking of oils and distillates by the Rittman process, and contains illustrations and drawings describing the construction of a one-tube experimental plant. Price, 10 cents.

Nitration of Toluene (Mines Bureau Technical Paper 146).—Discusses results of a series of experiments on the preparation of trinitrotoluene from toluene obtained in the manufacture of water gas. Price, 5 cents.

Underground Wastes in Oil and Gas Fields and Methods of Prevention (Mines Bureau Technical Paper 130).—Deals with the unnecessary destruction or lessening of the value of underground supplies of oil, natural gas, and potable water by the means of production now in ordinary use. Price, 5 cents.

SOIL SURVEYS

The following soil surveys, separates from Field Operations of the Bureau of Soils, 1914, contain descriptive text and maps of the area, climate, and soil. Price, 15 cents each:

Brazos County, Tex.
Dunklin County, Mo.
Pennington County, Minn.
Polk County, Ga.

STATISTICS

Financial Statistics of Cities Having Population of Over 30,000, 1915 (Census Bureau).—Contains in detail the financial transactions of 204 cities, the assessed valuation of taxable property, taxes levied thereon, indebtedness and assets at close of fiscal year, with proposed method of harmonizing accounting systems in various American cities. Price, 75 cents, cloth.

TECHNOLOGY

Determination of Aluminium as Oxide (Standards Bureau Scientific Papers 286).—Treats of the precipitation of aluminium hydroxide, washing the precipitate, separation from other elements, ignition and weighing of the precipitate, with conclusions drawn from procedure recommended and experiments outlined. Price, 10 cents.

Calculation of Planck's Constant C_2 (Standards Bureau Scientific Papers 287).—A mathematical discussion showing how simply the equations for all the known methods of calculating C_2 may be deduced from a general solution of Planck's equation. Price, 5 cents.

Methods of Making Electrolysis Surveys (Standards Bureau Technologic Papers 28).—Deals with the various types of measurements employed to determine the danger to underground pipes and cables due to the flow of stray electrical currents. Price, 20 cents.

Influence of Frequency of Alternating or Infrequently Reversed Current on Electrolytic Corrosion (Standards Bureau Technologic Papers 72).—Describes experimental work to determine the coefficient of corrosion of iron and steel in varying frequencies of alternating or reversed current. Price, 10 cents.

Data on Electric Railway Track Leakage (Standards Bureau Technologic Papers 75).—Presents data obtained as result of experiments on various trolley lines, giving general conditions on line and test, current leakage, and calculation of track and road bed resistance. Price, 10 cents.

Density and Thermal Expansion of American Petroleum Oils (Standards Bureau Technologic Papers 77).—Describes method of procedure and apparatus used, reduction of observations, and tabulated results, in detail, applicable to all petroleum oils, both crude and refined, produced in the United States. Price, 10 cents.

Properties of Some European Plastic Fire Clays (Standards Bureau Technologic Papers 79).—Scientific analysis of the physical qualities of European plastic fire clays, with tentative specifications by the authors for the substitution of foreign clay by a mixture of two or more American clays. Price, 10 cents.

WEATHER

Weather Forecasting in the United States (Weather Bureau Publication 583).—Papers by members of the forecasting staff of the Weather Bureau stating therein general rules and regulations that guide them in their work of forecasting the weather. Price, 85 cents.

IMPORTANT REPRINTS

Cottonseed Products and Their Competitors in Northern Europe: Part 2, Edible Oils (Special Agents Series 89).—A report dealing with the export trade in American cottonseed oil and the margarin industry. Price, 5 cents.

Teaching Language through Agriculture and Domestic Science (Education Bureau Bulletin 18, 1912).—Practical aid to rural teachers along a definite line which is clearly described in the text. Price, 5 cents.

59489—No. 260—16——2

Comparison of Public Education in Germany and in the United States (Education Bureau Bulletin 24, 1913).—Critical analysis of the educational system of both countries by the Director of Schools of Munich, Bavaria. Price, 5 cents.

Possible Causes of the Decline of Oil Wells (Mines Bureau Technical Paper 51).—Describes some of the remedial measures now employed and suggests means of bettering the present methods of operating. Price, 5 cents.

Electric Furnaces for Making Iron and Steel (Mines Bureau Bulletin 67).—Contains an historical review and discusses problems that remain to be solved in the use of electric furnaces for the smelting of iron ores and the production of pig iron at a profit. Price, 20 cents.

The Glacier National Park (Geological Survey Bulletin 600).—A popular guide to its geology and scenery, and also contains description of the general physical features, topographic map, and illustrations of the park and its scenic beauties. Price, 30 cents.

The Principal Household Insects of the United States (Entomology Bureau Bulletin 4, new series).—Life history and remedies for control of household pests which either annoy occupants by their direct attacks or are injurious to household goods and provisions. Price, 10 cents.

Canned Salmon, Cheaper than Meats, and Why (Fisheries Bureau Economic Circular 11).—Brief history of the Pacific salmon industry, including fifty tested recipes. Price, 5 cents.

The Functions and Uses of Food (Experiment Stations Office Circular 46).—With the aid of data contained in this circular the composition, digestibility and nutritive value of any given diet may be computed and its value ascertained. Price, 5 cents.

Economy of Farm Drainage (Agriculture Department Yearbook Separate 640).—Compares the anticipated results with the probable cost and illustrates various farms under cultivation before and after drainage. Price, 5 cents.

Application of Refrigeration to the Handling of Milk (Agriculture Department Bulletin 98).—Discusses methods of refrigeration in the operation of modern milk plant, and describes various systems of cooling. Price, 10 cents.

Methods Followed in the Commercial Canning of Foods (Agriculture Department Bulletin 196).—Description of modern factory equipment and methods, summary of results of experimental work, manufacturing processes and trade practices. Price, 10 cents.

Remedies and Preventives against Mosquitoes (Farmers' Bulletin 444).—Outlines safeguards to be followed for protection from bites, together with apparatus and fumigants for the destruction of mosquitoes and their breeding places. Price, 5 cents.

Raising Belgian Hares and other Rabbits (Farmers' Bulletin 496).—Treats of the history and characteristics of the Belgian Hare and gives much valuable advice to amateurs engaged in their breeding. Price, 5 cents.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis,* except as otherwise indicated. Publications should be ordered by the *publication number,* and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 1st session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{5}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

Notes of General Interest

A verbatim report of the testimony given at the hearings held by the Industrial Relations Commission upon which the final report of the Commission was based is now being received from the press in the form of Senate Document 415. The four volumes which have already been issued, the contents of which will be found on page 175 of this month's Catalogue, are uniformly priced at $1.00 each. It is expected that the set when completed will consist of eleven volumes, and will be one of the most important contributions on economic conditions in the labor world that has appeared in recent years. Copies for depository libraries can not be distributed until after the Schedule of Volumes of documents and reports of the first session of the Sixty-fourth Congress is prepared, which will probably not be accomplished before January 1, 1917.

The "Special Report on Diseases of Cattle," a popular and widely known Government publication, has been revised and brought up to date in compliance with a recent resolution of Congress. This report treats of the causes, symptoms, and treatment of various ailments and injuries which afflict live-stock animals and is valued highly as a reference book by veterinarians, stockmen, and farmers. Price, $1.00.

The following is a brief review of other Government publications received in stock during the month of September by the Superintendent of Documents and can be obtained from his office at the prices quoted:

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see page 184.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the indorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 1st session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{5}{10}$c. for each

additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Maps

Florida. State of Florida. Scale 1:500,000. [Washington] Geological Survey, 1916. 57.9×41.7 in. † 45c.

Topographic sheets

Note.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

NORTHERN AND NORTHWESTERN LAKES SURVEY

Note.—Charts of the Great Lakes and connecting waters and St. Lawrence River to the international boundary at St. Regis, of Lake Champlain, and of the New York State Canals (series in preparation—2 charts published), are prepared and sold by the U. S. Lake Survey Office, Old Custom-house, Detroit, Mich. Charts may also be purchased at the following U. S. engineer offices: 710 Army Building, New York, N. Y.; 25 North Pearl St., Albany, N. Y.; 540 Federal Building, Buffalo, N. Y.; and Canal Office, Sault Ste. Marie, Mich. A catalogue (with index map), showing localities, scales, prices, and conditions of sale, may be had upon application at any of these offices.

A descriptive bulletin, which supplements the charts and gives detailed information as to harbors, shore lines and shoals, magnetic determinations, and particulars of changing conditions affecting navigation, is issued free to chart purchasers, upon request. The bulletin is revised annually and issued at the opening of navigation (in April), and supplements thereto are published monthly during the navigation season.

Complete sets of the charts and publications may be seen at the U. S. engineer offices in Duluth, Minn., Milwaukee, Wis., Chicago, Ill., Grand Rapids, Mich., Cleveland, Ohio, and Oswego, N. Y., but they are obtainable only at the sales offices above mentioned.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 1st session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{8}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see next page.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Third Assistant Postmaster General, Finance Division, Washington, D. C. These maps should not be confused with the post route maps, for which see Monthly catalogue for January, 1916, page 361.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis,* except as otherwise indicated. Publications should be ordered by the *publication number,* and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 2d session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions, and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{5}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington.

INTERNATIONAL HIGH COMMISSION

NOTE.—By the 1st Pan American Financial Conference, which was held at Washington in May, 1915, with a view to bringing about closer financial and commercial relations between the American Republics and to that end to foster uniformity of law and procedure in such matters, it was recommended that, in order to carry out these great objects, there should be created an International High Commission, a section of which should be established in each country. This recommendation was promptly carried into effect in the countries concerned; and by the act of Congress of Feb. 7, 1915, the United States section was endowed with a legal status. Each section consists of nine members, and is composed of jurists, financiers, and technical administrators.

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Third Assistant Postmaster General, Finance Division, Washington, D. C. These maps should not be confused with the post route maps, for which see Monthly catalogue for January, 1916, page 361.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 2d session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions, and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

Monthly catalogue distribution

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

Library of Congress cards

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{5}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see next page.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Third Assistant Postmaster General, Finance Division, Washington, D. C. These maps should not be confused with the post route maps, for which see Monthly catalogue for January, 1916, page 361.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

NORTHERN AND NORTHWESTERN LAKES SURVEY

NOTE.—Charts of the Great Lakes and connecting waters and St. Lawrence River to the international boundary at St. Regis, of Lake Champlain, and of the New York State Canals (series in preparation—2 charts published), are prepared and sold by the U. S. Lake Survey Office, Old Custom-house, Detroit, Mich. Charts may also be purchased at the following U. S. engineer offices: 710 Army Building, New York, N. Y.; 25 North Pearl St., Albany, N. Y.; 540 Federal Building, Buffalo, N. Y.; and Canal Office, Sault Ste. Marie, Mich. A catalogue (with index map), showing localities, scales, prices, and conditions of sale, may be had upon application at any of these offices.

A descriptive bulletin, which supplements the charts and gives detailed information as to harbors, shore lines and shoals, magnetic determinations, and particulars of changing conditions affecting navigation, is issued free to chart purchasers, upon request. The bulletin is revised annually and issued at the opening of navigation (in April), and supplements thereto are published monthly during the navigation season.

Complete sets of the charts and publications may be seen at the U. S. engineer offices in Duluth, Minn., Milwaukee, Wis., Chicago, Ill., Grand Rapids, Mich., Cleveland, Ohio, and Oswego, N. Y., but they are obtainable only at the sales offices above mentioned.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 2d session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions, and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{8}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The material that ordinarily would have appeared in v. 2 of the report for 1915 is here published as v. 2 of the report for 1916. This delay in the publication of the data was caused by the fact that it was impossible to compile the statistics within the time set by Congress.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see next page.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis,* except as otherwise indicated. Publications should be ordered by the *publication number,* and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 64th Congress, 2d session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions, and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

Monthly catalogue distribution

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

Library of Congress cards

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included)

on the cards. The price of the cards is 2c. for the first card and ½c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.**, by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent, from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see page 598.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1 : 62,500, 1 : 125,000, and 1 : 250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more, and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

District of Columbia. Maryland, District of Columbia, Virginia, Washington and vicinity, lat. 38° 45′–39° 05′, long. 76° 52′ 30″–77° 15′. Scale 1 : 31,680, contour interval 10 ft. [Washington, Geological Survey] edition of 1917. 47.1×41.7 in. TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Third Assistant Postmaster General, Finance Division, Washington, D. C. These maps should not be confused with the post route maps, for which see Monthly catalogue for January, 1917, page 458.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis,* except as otherwise indicated. Publications should be ordered by the *publication number,* and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 65th Congress, 1st session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions, and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{8}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk. *Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.*

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

Notes of General Interest

The following publications issued by the various departments of the Government during the month of April are here reviewed under appropriate subject headings and can be obtained from the Office of the Superintendent of Documents at prices quoted:

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.06 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see p. 660.

Minnesota. Minnesota. Scale 1:1,000,000. [Washington] Geological Survey, 1917. 26.8×23.8 in. † 5c.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

‡Document not obtainable.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 65th Congress, 1st session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions, and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{1}{2}$c. for each

additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.**, by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

INTERNATIONAL HIGH COMMISSION

NOTE.—By the 1st Pan American Financial Conference, which was held at Washington in May, 1915, with a view to bringing about closer financial and commercial relations between the American Republics and to that end to foster uniformity of law and procedure in such matters, it was recommended that, in order to carry out these great objects there should be created an International High Commission, a section of which should be established in each country. This recommendation was promptly carried into effect in the countries concerned; and by the act of Congress of Feb. 7, 1915, the United States section was endowed with a legal status. Each section consists of nine members, and is composed of jurists, financiers, and technical administrators.

TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Third Assistant Postmaster General, Finance Division, Washington, D. C. These maps should not be confused with the post route maps, for which see Monthly catalogue for January, 1917, page 458.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

NORTHERN AND NORTHWESTERN LAKES SURVEY

NOTE.—Charts of the Great Lakes and connecting waters and St. Lawrence River to the international boundary at St. Regis, of Lake Champlain, and of the New York State Canals (series in preparation—3 charts published), are prepared and sold by the U. S. Lake Survey Office, Old Custom-house, Detroit, Mich. Charts may also be purchased at the following U. S. engineer offices: 710 Army Building, New York, N. Y.; 467 Broadway, Albany, N. Y.; 540 Federal Building, Buffalo, N. Y.; and Canal Office, Sault Ste. Marie, Mich. A catalogue (with index map), showing localities, scales, prices, and conditions of sale, may be had upon application at any of these offices.

A descriptive bulletin, which supplements the charts and gives detailed information as to harbors, shore lines and shoals, magnetic determinations, and particulars of changing conditions affecting navigation, is issued free to chart purchasers, upon request. The bulletin is revised annually and issued at the opening of navigation (in April) and supplements thereto are published monthly during the navigation season.

Complete sets of the charts and publications may be seen at the U. S. engineer offices in Duluth, Minn., Milwaukee, Wis., Chicago, Ill., Grand Rapids, Mich., Cleveland, Ohio, and Oswego, N. Y., but they are obtainable only at the sales offices above mentioned.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 65th Congress, 1st session, is to be understood.

Sales of Government Publications

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions, and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{5}{10}$c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate copies can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.

For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), so that a discount of 40 per cent. from the retail price is now allowed on all orders the net cost of which amounts to $3.00 or more. This rate applies on an order of either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire. Address the Director of the Geological Survey, Washington. For topographic sheets see below.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New

Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. The discount is allowed on all orders, the net cost of which amounts to $3.00 or more and applies on an order for either maps or folios alone or for maps and folios together, but does not apply to the folios sold at 5c. each on account of damage by fire.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

NORTHERN AND NORTHWESTERN LAKES SURVEY

NOTE.—Charts of the Great Lakes and connecting waters and St. Lawrence River to the international boundary at St. Regis, of Lake Champlain, and of the New York State canals (series in preparation—3 charts published), are prepared and sold by the U. S. Lake Survey Office, Old Custom-house, Detroit, Mich. Charts may also be purchased at the following U. S. engineer offices: 710 Army Building, New York, N. Y.; 467 Broadway, Albany, N. Y.; 540 Federal Building, Buffalo, N. Y.; and Canal Office, Sault Ste. Marie, Mich. A catalogue (with index map), showing localities, scales, prices, and conditions of sale, may be had upon application at any of these offices.

A descriptive bulletin which supplements the charts and gives detailed information as to harbors, shore lines and shoals, magnetic determinations, and particulars of changing conditions affecting navigation, is issued free to chart purchasers, upon request. The bulletin is revised annually and issued at the opening of navigation (in April), and supplements thereto are published monthly during the navigation season.

Complete sets of the charts and publications may be seen at the U. S. engineer offices in Duluth, Minn., Milwaukee, Wis., Chicago, Ill., Grand Rapids, Mich., Cleveland, Ohio, and Oswego, N. Y., but they are obtainable only at the sales offices above mentioned.
